

RENO REFRACTORIES, INC

ElectroPump™ Sil 1199

TECHNICAL DATA SHEET

ElectroPump™ Sil 1199 is a fused silica based, no cement castable based on Reno's Electro-Chemical bond system. This product is designed to be placed by pump/casting.

- Based on Reno's proprietary Electro-Chemical bond system for maximum performance.
• Low porosity and permeability further reduces penetration and reaction with vapors.
• Recommended for use in applications where the presence of chlorine, sulfur compounds, and alkali vapors are present.
• Excellent Thermal Shock resistance.
• Provides unique physical properties that allow the refractory to excel against dirty fuels.
